# VISION - MISSION

Our vision is to be a leading childcare placement and childcare design consultancy that is recognised for creating safe, innovative and inspiring environments where children can thrive, educators can succeed, families can trust and communities can grow.

Our mission is to combine childcare expertise with design innovation to deliver tailored, compliant and sustainable spaces that enhance learning, support educators, and give families peace of mind. We believe in a client-based approach, tailoring services to meet the unique needs and objectives of each childcare provider and each family who become our clients.

# COMPANY VALUES

We create childcare environments and place children where they will feel safe, supported, and inspired to grow. Guided by over 25+ years of early years industry experience, we design and place with purpose — balancing compliance, functionality, and beauty with calm environments that foster growth and learning in little learners.

We collaborate with all stakeholders, including educators, families, and communities to deliver innovative solutions that honour culture, empower educators, and prioritise child wellbeing at every stage of design and/or placement option of your precious little one.

# ABOUT LISA TASKOV .....

With 25+ years of working directly in the childcare industry as an on the floor leader and service manager, I have seen first hand how design of space, children's learning, and safety is paramount for a happy and calm learning environment.

I want to use my knowledge to help service providers create environments and families to choose environments that are suitable to them.

I have recently diversified my centre based management role into more of an advisory and design focused position, and that is how childcare placement and design by Lisa Taskov was born.

## **Who Do We Work With:**

**Service Owners/Providers, Architects, Builders, Families, Directors, Educators and Educational Leaders**

# CHILDCARE PLACEMENT

## **Connecting families with tailored childcare options:**

We offer families guidance to find the right childcare centre for them and their little one.

We do centre tours on their behalf or come along for support, if desired.

We offer assistance with enrolment, orientation, government rebates and subsidies. And we offer general childcare advice as an “all in one” go to option.

We pride ourselves on working collaboratively with our clients, offering an “Obligation Free Chat” as well as Flexible Pricing Plan Options for all family budgets.

# CHILDCARE DESIGN

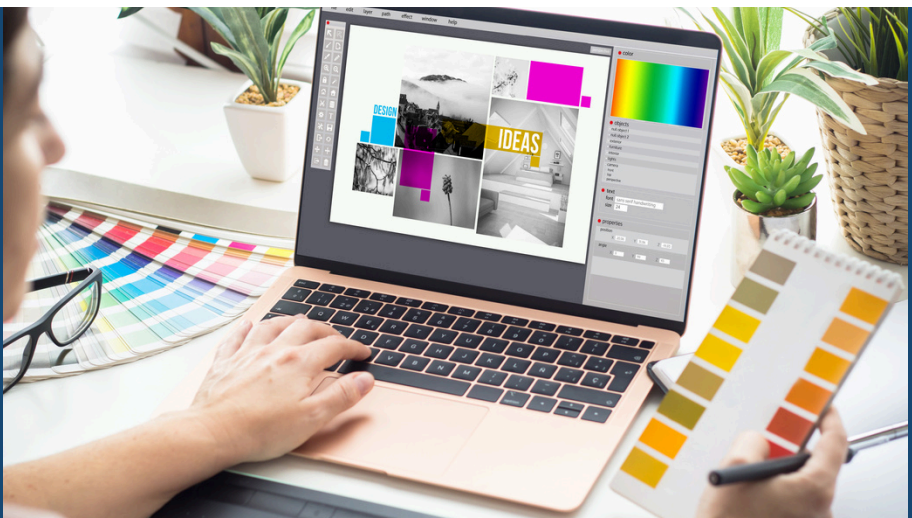

By using industry knowledge and expertise, we will work with your architect and builder to offer design advice to help new childcare business owners to develop and design their own unique and individual space.

We can offer competitive priced support designs, peer reviews / briefs, design documentation & renderings to enhance your whole building experience.

Furthermore we offer a unique augmented reality service that enables clients to experience and review their design concepts in full scale, providing a true-to-life understanding of their new operation. Imagine being able to see your work onsite before the building even starts, or more specifically at the start of renovations to an older building site that is hard to perceive until finished, we can offer you that and more!

We can lead you on a journey of ideas from start to finish, including pointing you in the direction of equipment purchases, play grounds, licenses, marketing & media, programming & policies advice.

We will work collaborately with all stakeholders to create a certainty to our client that all avenues of communication are open and transparent.

# THANK YOU
